baier & michels
Connections that last

Who we are

baier & michels, or b&m for short: your partner in all aspects of cold forming.

Founded in 1932 as a local screw dealer, today with 500 employees at nine locations and a member of the Würth Group with a global presence: baier & michels (b&m), headquartered in Ober-Ramstadt, scores in Europe, Asia and North America as an innovative industry partner in the field of cold forming.

The basis for this is formed by fasteners, closing- and sealing systems developed and manufactured in-house. Our customers include OEMs and suppliers of the automotive, electrical engineering, medical technology as well as the tools and appliances sectors. In addition to application technology consulting, we also offer training courses and, with b&m-PORT®, an online portal that supports industrial companies in the standardization of their C-parts.

What drives us are solutions that always meet the highest demands of our customers - and bring them real benefits: better quality, higher productivity, more resource-efficient manufacturing, reduced costs and risks.

	Locations 9
	Employees 500
	Innovations 29

Innovations with added value

b&m-TRIMNUT®

Fasteners with additional integrated functions to solve application problems

b&m-REPTO® B

Threaded bolts for plastics with different embedding methods

b&m-KL PLUG®

Closing and sealing system for holes with or without pressure load

b&m-TIGHT®

Direct screwing system with integrated sealing function for aluminum-steel hybrid applications

What is your challenge?

Closing and Sealing Systems

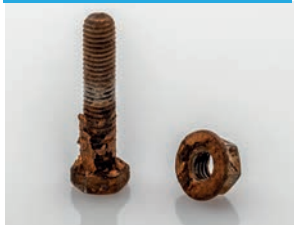

Threaded Inserts and Bolts

Non-cutting Alternative for Turned Part Production

Fasteners with Integrated Functions

Direct Screwing in Plastics and CFK

Direct Screwing in Metals

Bearings and Dampers

Blind Rivet Systems

What makes us stand out

Production

State-of-the-art technology
Made in Germany

Quality

Passion and striving for
perfection

Engineering

Reliable technical develop-
ment partner

Prototyping 4.0

System solution for C-part
standardization

b&m
